KEY TO SYMBOLS OF CLASSIFICATION IN YACHT REGISTER.

*A1 Character of Yachts built of Iron with thicker plating than the Society's Rules *now* require.

A1 Character of Yachts built of Iron according to the Society's Rules in force between the years 1864 and 1871.

A1 Without a numeral prefixed, character assigned to Iron Yachts already built to which the Society's Rules do not apply.

100A1 Character of Yachts built of Iron or Steel in accordance with or equal to the Society's Rules and Tables.

90A1 Character of Yachts built of Iron or Steel in some respects deficient of the requirements of the 100A class.

A1 Character of Wood or Composite built Yachts of the first class, well and sufficiently equipped. The figures prefixed to the character indicate the term of years for which the Vessel is at present classed. Figures placed within parentheses indicate the expired term of years—originally if on the first line, and on continuation or restoration if on lower lines.

A...... Without a term of years indicates that the Yacht, though not built under Survey or according to the Society's Rules, is considered worthy of the class assigned.

1 ...... The figure 1 after a character signifies that the Yacht is well and efficiently equipped, as per Table 14.

† Prefixed to the class of a Yacht indicates that she is also classed in the Register Book for Merchant Ships, and that the scantlings are equal to the requirements of the same.

The figures under a character denote the date when the Vessel was last Surveyed.

When the Character is omitted from the twelfth column it indicates that the Character has expired or been withdrawn from absence of Survey, or on account of non-payment of fees due in the case.

The figure 1 after the letter A, A or A indicates that the equipment is in accordance with or equal to the Rules.

A line thus — after the letter A, A or A signifies that the equipment is *not* in accordance with the Rules.

The eleventh and twelfth Columns left blank, indicate that the Vessel has never been Classed in the Register Book. Three dots ... in Column 11 indicate that the Vessel was at one time Classed by this Society, but that the Class has been withdrawn at owner's request. A black line with date under it in Column 12 indicates that, at that date, the Vessel, from reported defects, *was not entitled to a Character in the Register Book. A red line with date under it in this Column indicates that the Class was withdrawn from non-compliance, at that date, with the Society's Rules.*

Lv ✠ A1* Lv ✠ A1 Indicate the classes assigned by the Underwriters' Register for Iron Vessels, now amalgamated with Lloyd's Register

	4	**Tonnage**—The Yacht or Thames Measurement tonnage is computed in the following manner:—From the length (measured from the fore side of stem to the after side of sternpost on deck) deduct the breadth, multiply this result by the breadth, and that product by the half breadth, and divide by ninety-four.
	4	**Tonnage.** The tonnage recorded in the Yacht Register in type like that shown at the side hereof, is, with a few exceptions, the official registered tonnage measured according to the law of the country to which the yacht belongs. } 204·51 (Net) 546·65 (Gross) For some foreign yachts, the tonnage which is recorded has been measured in accordance with British rules and is accepted under British law. In such cases, the fact is indicated by the use of italic figures, thus:— } *204·51* (Net) *546·65* (Gross)
	5	**Dimensions** are placed under dotted lines thus :— $\overset{\dots}{30{\cdot}0}\,\vert$ $\overset{\dots}{7{\cdot}0}\,\vert$ $\overset{\dots}{3{\cdot}0}$ when they have not been obtained from the Vessel's Official Register or have not been verified by the Society's Surveyors.

SIGNS AND ABBREVIATIONS (Alphabetically arranged).

Abbreviation or Sign.	No. of Column.	Signification.
		1. In cases of yachts in which the particulars of boiler pressures and surfaces are known :— $\text{NHP}=\frac{P+340}{1000}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$ where the boiler pressure is below 160℔. $=\frac{P+590}{1500}\left(\frac{D^2\sqrt{S}}{100}+\frac{H}{15}\right)$ where the boiler pressure is 160℔ or above. If the boilers are fitted with Forced Draught or Induced Draught appliances, then $\frac{H}{12}$ is taken instead of $\frac{H}{15}$. 2. In cases where particulars of the boiler pressures and heating surfaces are not known :— $\text{NHP}=\frac{D^2\sqrt{S}}{100}$ for Triple and Quadruple Expansion Engines. $=\frac{D^2\sqrt{S}}{120}$ for Compound Engines. $=\frac{D^2\sqrt{S}}{130}$ for Simple Engines. In the above Rules, D = diameter of L.P. Cylinder in inches. S = Stroke in inches. H = Heating surface in square ft. P = Working pressure in ℔ per square inch.
RHP	8	**Registered Horse Power.** This note shows that the horse power given is the nominal horse power as recorded in the Official Register of the yacht.

EXTRACTS FROM THE RULES.

Rule 51.—RATING RULE.

The Y.R.A. rating shall be ascertained by the following formula:—

$$\frac{L + B + 0{\cdot}75\,G + 4d + 0{\cdot}5\,\sqrt{SA}}{2{\cdot}1} = \text{Rating.}$$

where L = Length in feet,

YACHT RACING ASSOCIATION.

EXTRACTS FROM THE RULES—*continued.*

The following shall apply to all Yachts above 36 feet:—

Framed and glazed skylights with sashes to open, to be fitted to every cabin, which extends across the yacht, having a clear deck opening of not less than 4 per cent. of the deck area of such cabin.

A fixed companion, with sliding cover, or other means of closing it to be fitted, and a ladder or stairway, which may be hinged or pivoted, but must not be totally unshipped when racing.

Should a companion be fitted over a cabin, it shall be regarded as equivalent to a skylight.

In all cabins the sides of the vessels above the fittings to be lined, either close or, if with battens, the spaces not to exceed 25 per cent. of the whole. Textile fabrics may be used for lining if fitted in wood frames.

During a Race, the platforms shall be kept down and bulkheads standing, and all the other fittings specified retained on board except cots and skylights; no water may be started from or taken into the tanks; no more than the usual anchors and chains may be carried; no bags of shot may be on board; all ballast must be properly stowed under the platforms or in lockers; and no ballast or other dead weights may be used as shifting ballast or for altering the trim of a Yacht.

No ballast shall be shipped, unshipped, or shifted, after 9 p.m. of the day previous to that on which the Race is sailed.

Rules 24 & 25.—CREW AND FRIENDS IN YACHTS OF DIFFERENT RATINGS.

In Yachts of 42 ft. rating and under, the total number of persons on board during a race under Y.R.A. rating shall not exceed the number set forth in the following table:—

Not exceeding 18 ft. rating	2 persons.
Exceeding 18 ft. and not exceeding 24 ft. rating ...	3 „
Exceeding 24 ft. and not exceeding 30 ft. rating ...	5 „
Exceeding 30 ft. and not exceeding 36 ft. rating ...	7 „
Exceeding 36 ft. and not exceeding 42 ft. rating ...	9 „

Should an owner elect to have his Yacht measured for rating length with a smaller number of persons on board than set forth in the foregoing table, such number shall be stated on the certificate of rating, and shall not be exceeded in any race sailed under that certificate.

In Yachts above 42 ft. rating there shall be no limit as to the number of paid hands, and no restrictions as to the number of friends or their working.

Rule 54.—GIRTH AND GIRTH DIFFERENCE.

The girth shall be the chain girth under the keel, in the plane of the girth marks (*see* Rule 56), from upper mark to upper mark, less the sum of the vertical heights of the upper marks above the water-level. (*See* Fig. 3, A B C less [A D + C E].) The girth difference shall be the difference between the girth so measured from upper mark to upper mark, and that between the same points measured along the actual outline of the cross-section in the plane of the girth marks. (*See* Fig. 3, A F B G C less A B C.) Should there be any hollow in the fore and aft under-water profile (*see* Fig. 1), or should the draft at the girth station be less than at any point forward of that station (*see* Fig. 2), or less than half the extreme beam (*see* Fig. 4), the girth and girth difference measurements shall be taken under an imaginary keel line such as to exclude all these conditions (as the line *c d*, Figs. 1 and 2, and point B, Fig. 4).

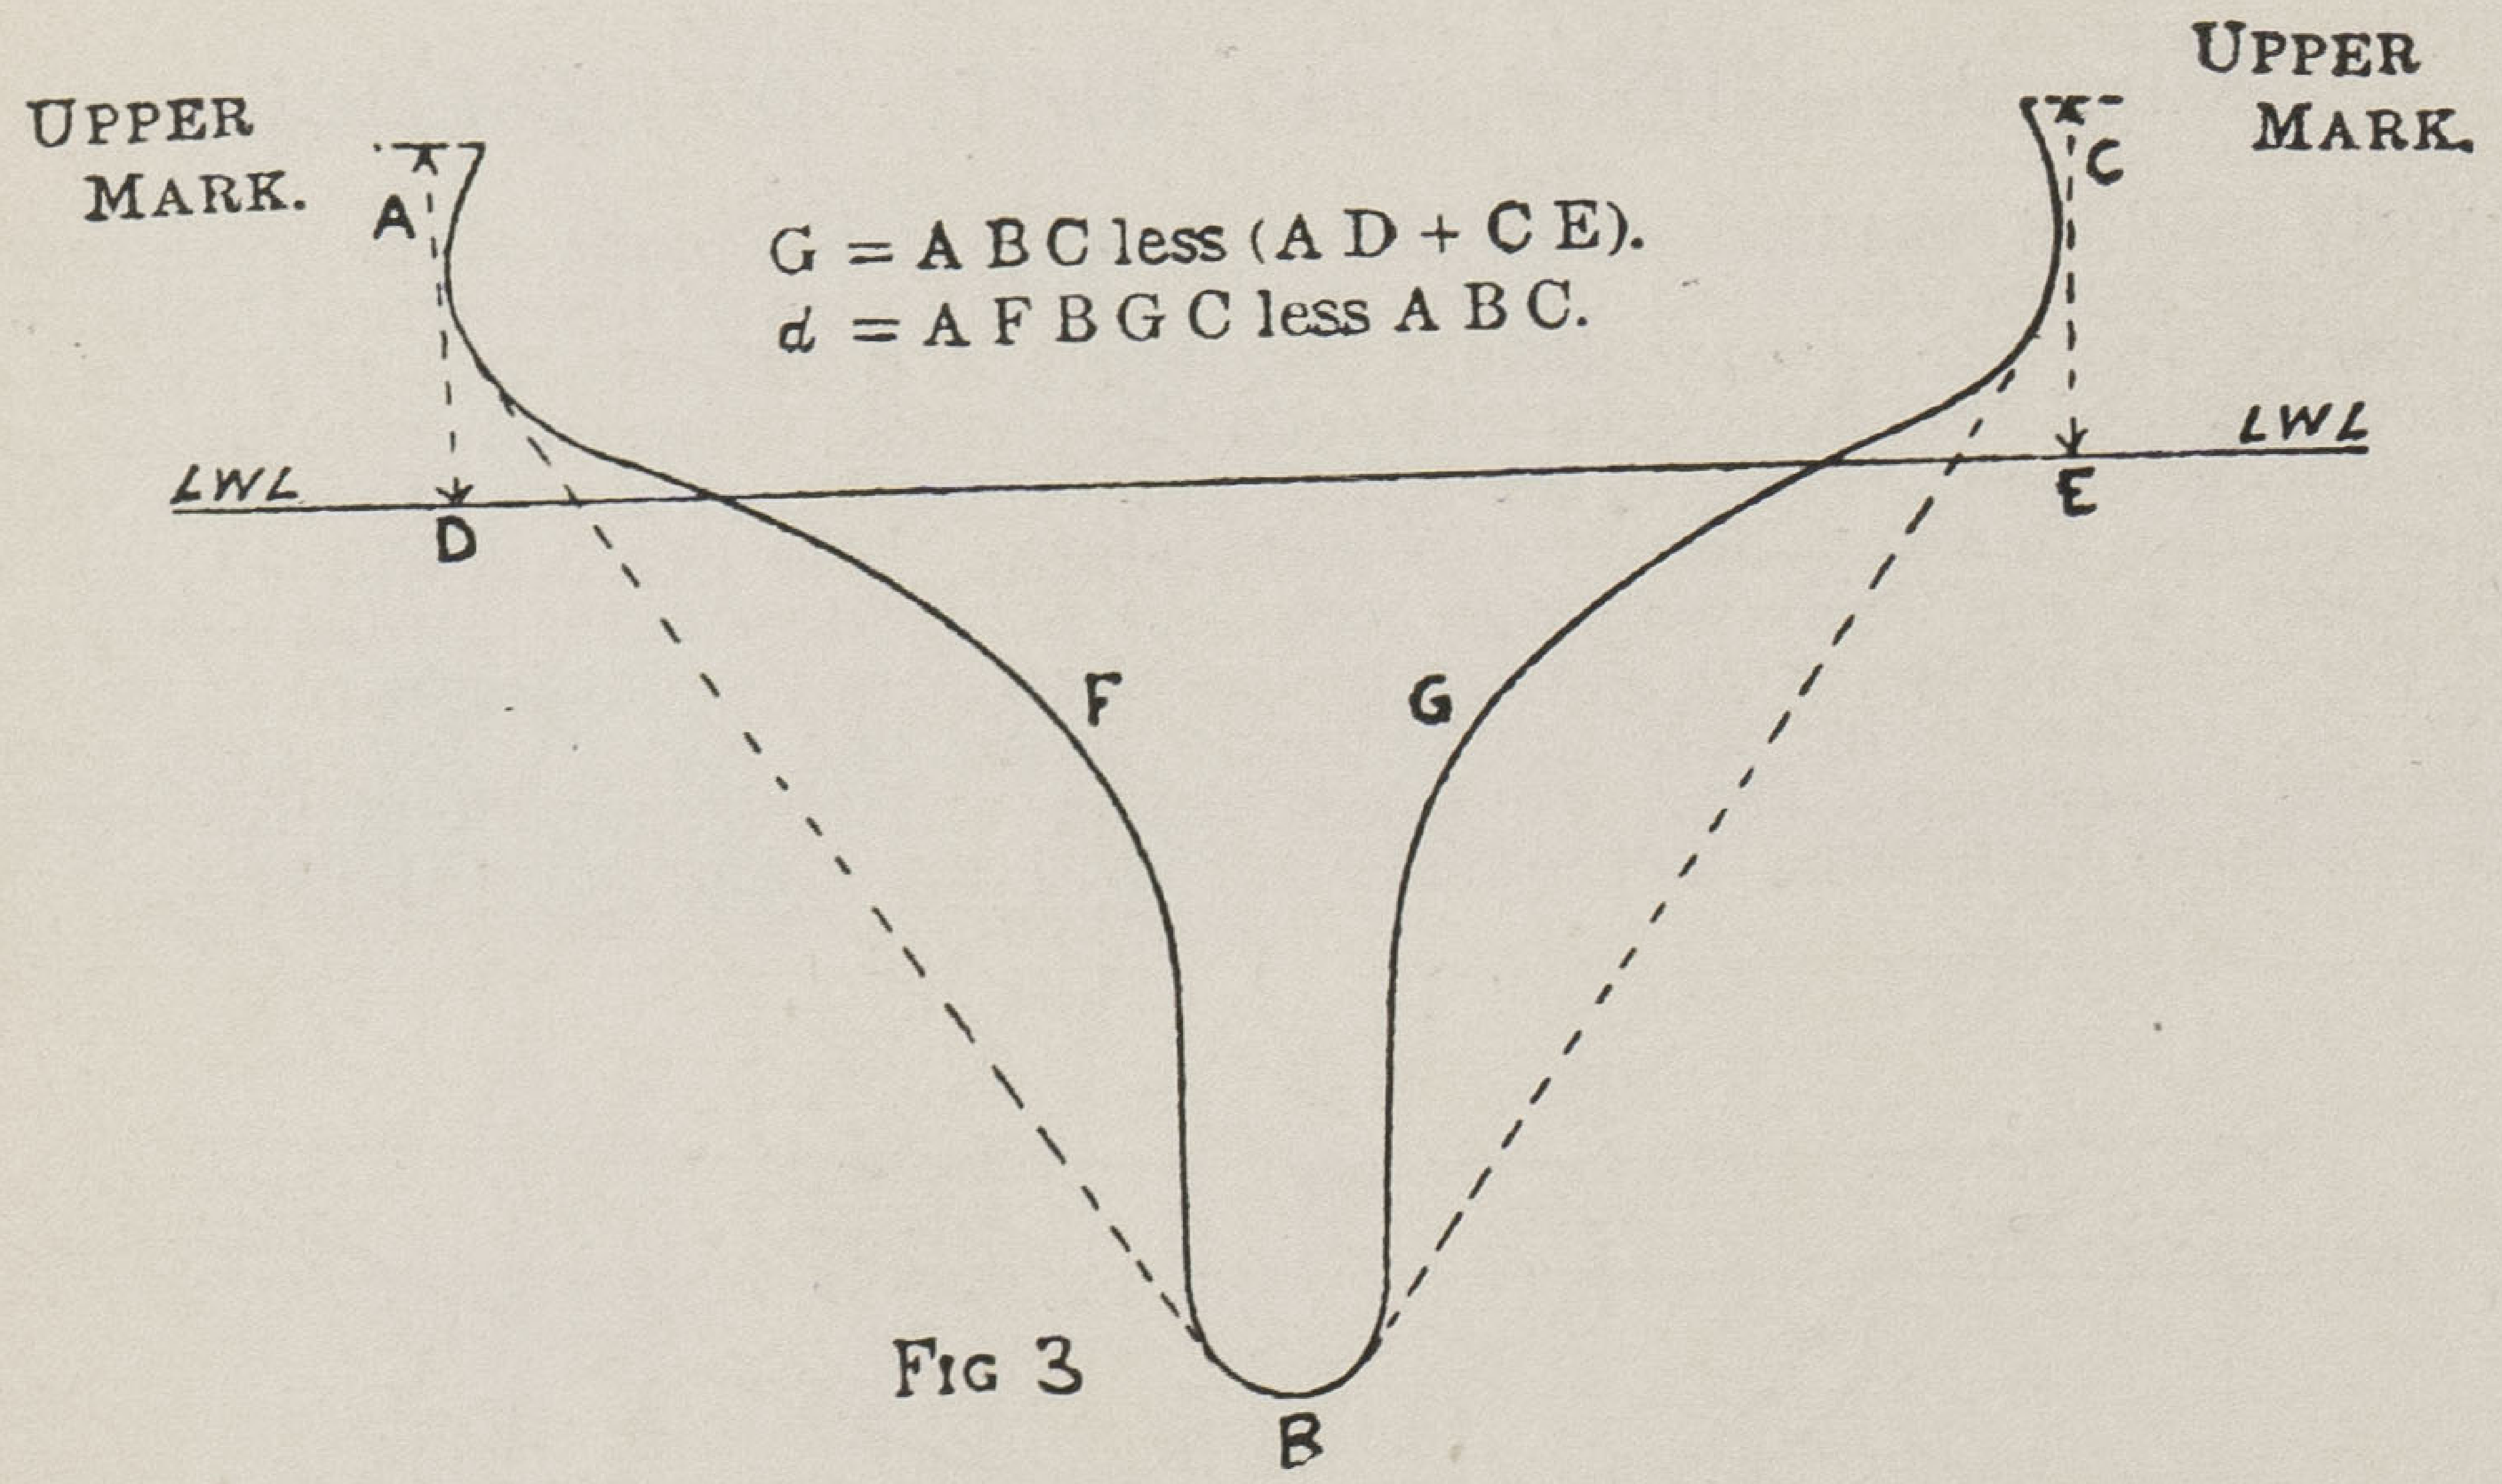

FIG 3

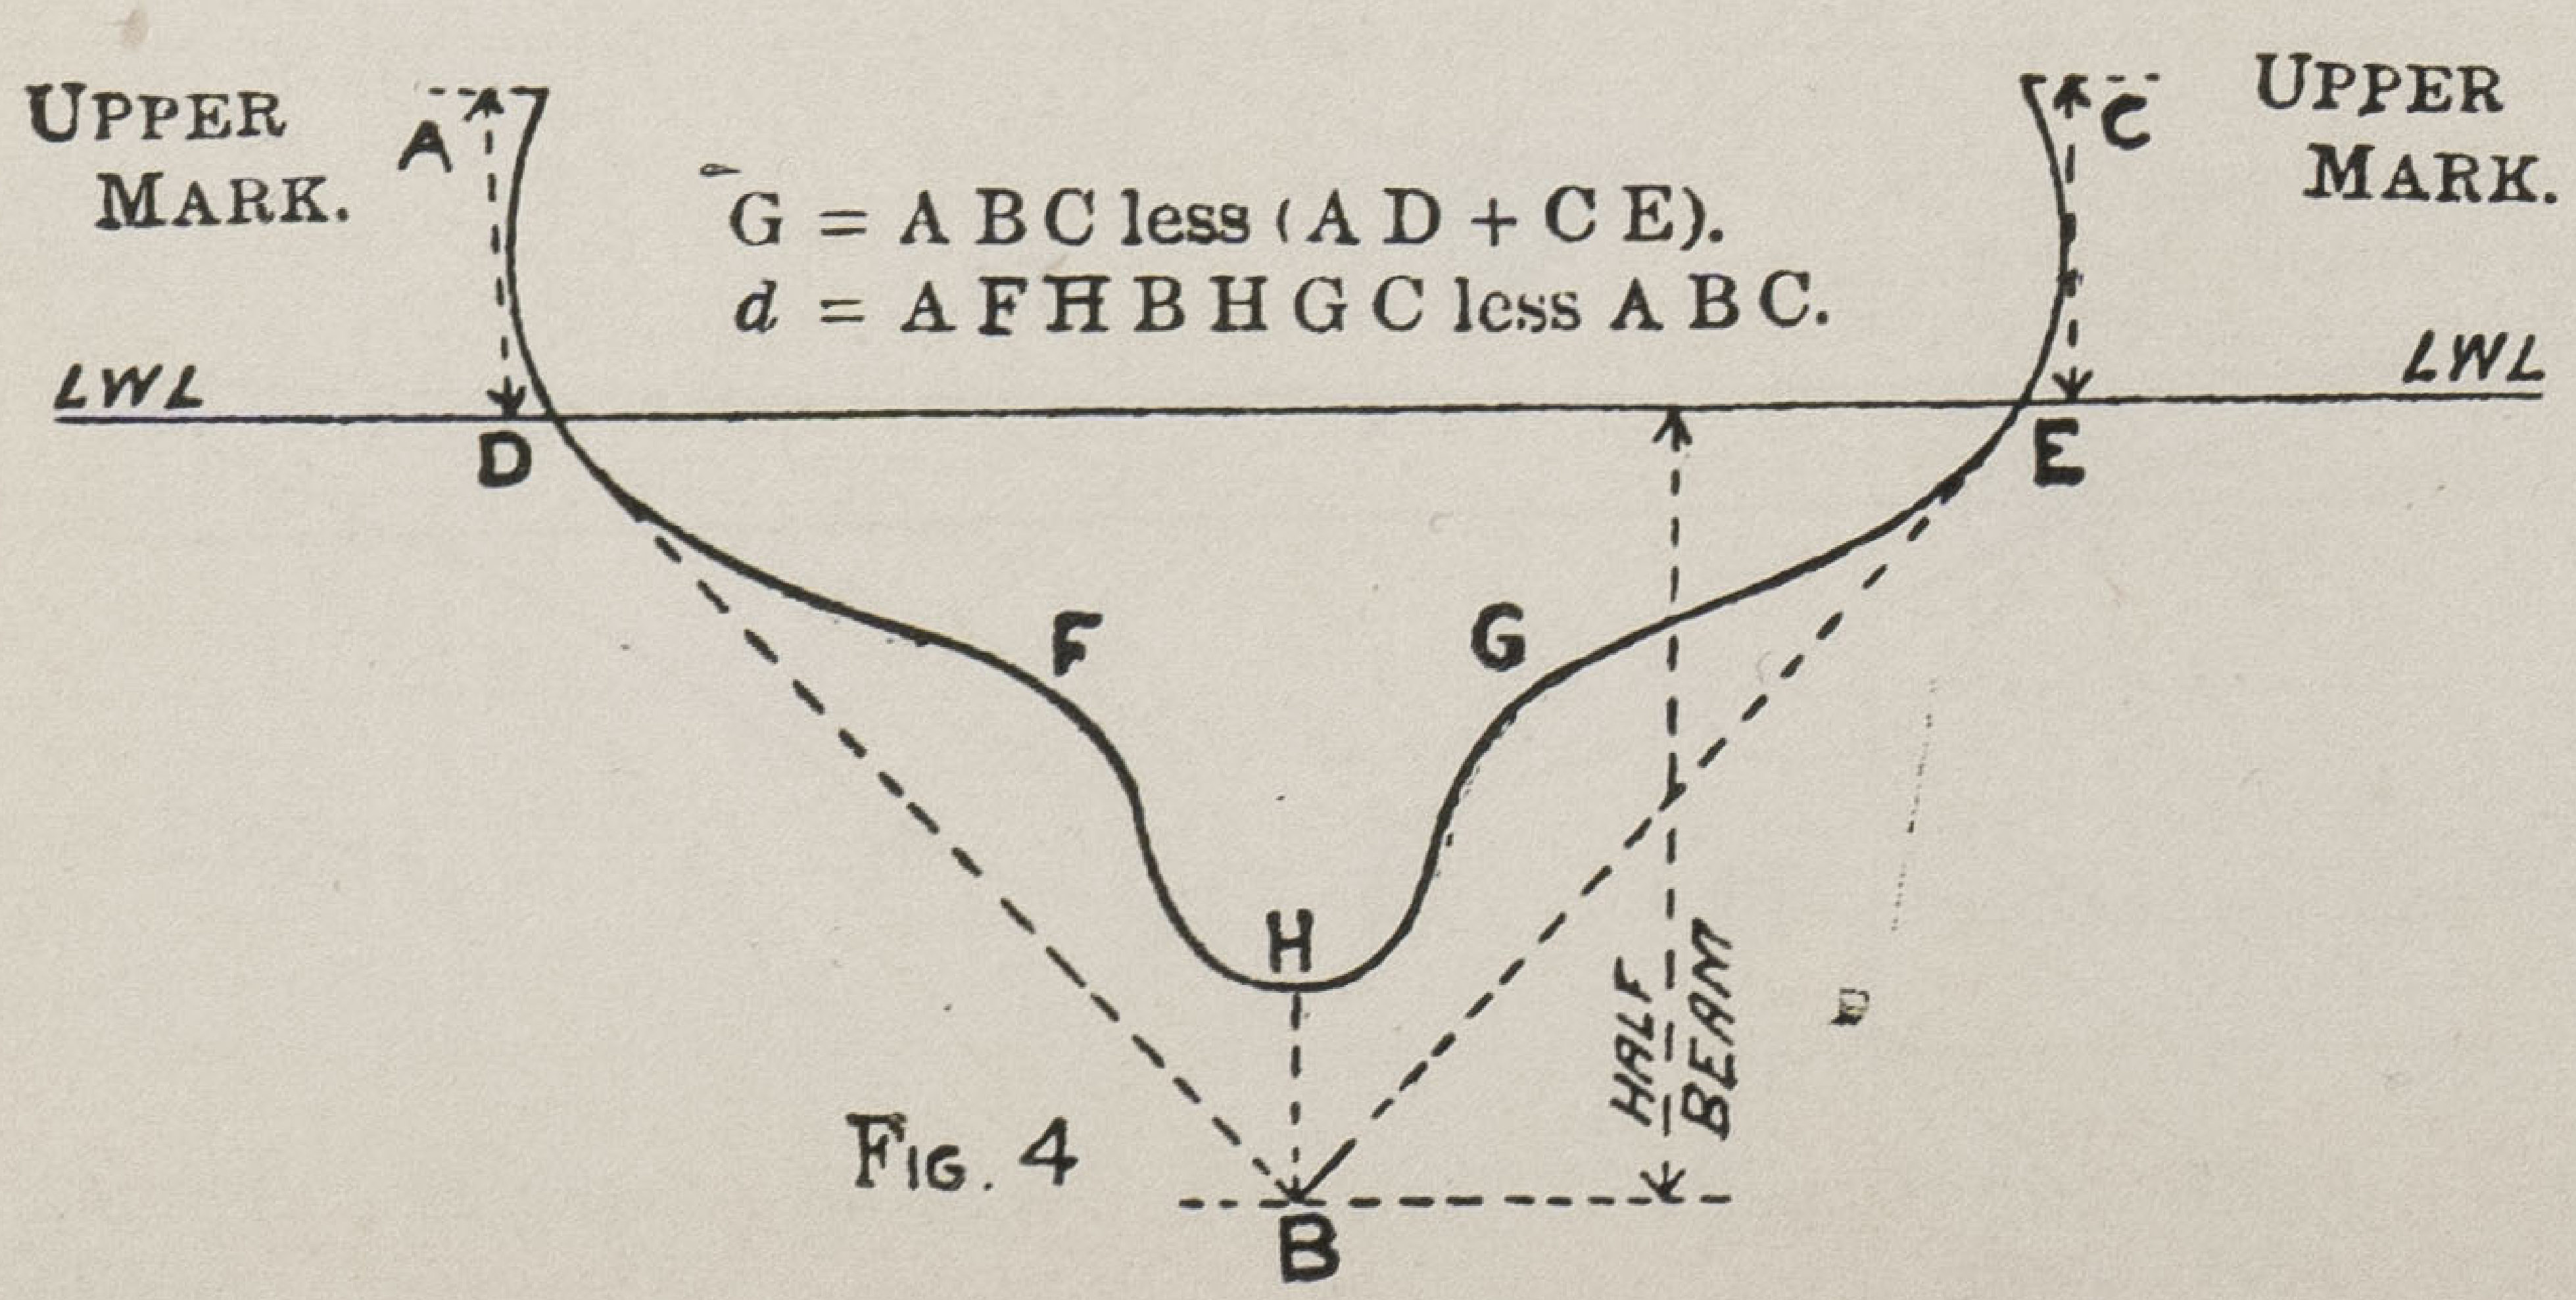

FIG. 4

Rule 56.—OWNERS TO MARK LENGTH AND GIRTH.

Owners must affix the official length marks at the bow and stern, on both sides of the yacht, in such manner as the Council may direct, so that, when lying in smooth water in her usual racing trim, with crew on board, at or about the mid overall length, she shall not be immersed beyond the plumb of the outer edges of the marks. Owners must affix the official girth marks on both sides, as follows, viz.:—One immediately under the rail or covering board, and another on the side of the keel; these marks to be in the same transverse plane, which must be perpendicular to the water-line, and at a station 0·6 of the distance between the outer edges of the length marks from the fore end. (*See* Fig. 1, *a* upper mark, *á* lower mark.)

The heights of the upper marks above the water-level (*see* Rule 54) are to be measured on both sides when the yacht is lying in smooth water, trimmed as above specified.

Rule 60.—CERTIFICATE OF RATING.

As soon as a yacht has been measured, the Official Measurer shall forward the measurements, with the sailmaker's diagram, to the Secretary of the Yacht Racing Association, who shall thereupon issue a certificate of rating, which shall be in force from the date of the completion of the measurement. If from any peculiarity in the build of the yacht, or other cause, the measurer shall be of opinion that the rule will not rate the yacht fairly, or that in any respect she does not comply with the requirements of these rules, he shall report the circumstances to the Council, who, after due inquiry, shall award such certificate of rating as they may consider equitable, and the measurement shall be deemed incomplete until this has been done.

Rule 62.—CERTIFICATE NOT TO BE GRANTED TO YACHTS UNDER 15 CWT. IN WEIGHT.

No certificate of rating shall be granted to any yacht weighing less than 15 cwt. in racing trim without crew.

YACHT RACING ASSOCIATION.

EXTRACTS FROM THE RULES—*continued.*

Rule 59.—TO CALCULATE THE AREAS.

Mainsail.—To find the area of the mainsail—Multiply A by B and C by D, as per illustration, and add the two products together and divide by 2.

Yard Topsail.—To find the area of the yard topsail—Multiply E by F and G by H, as per illustration, and add the two products together and divide by 2.

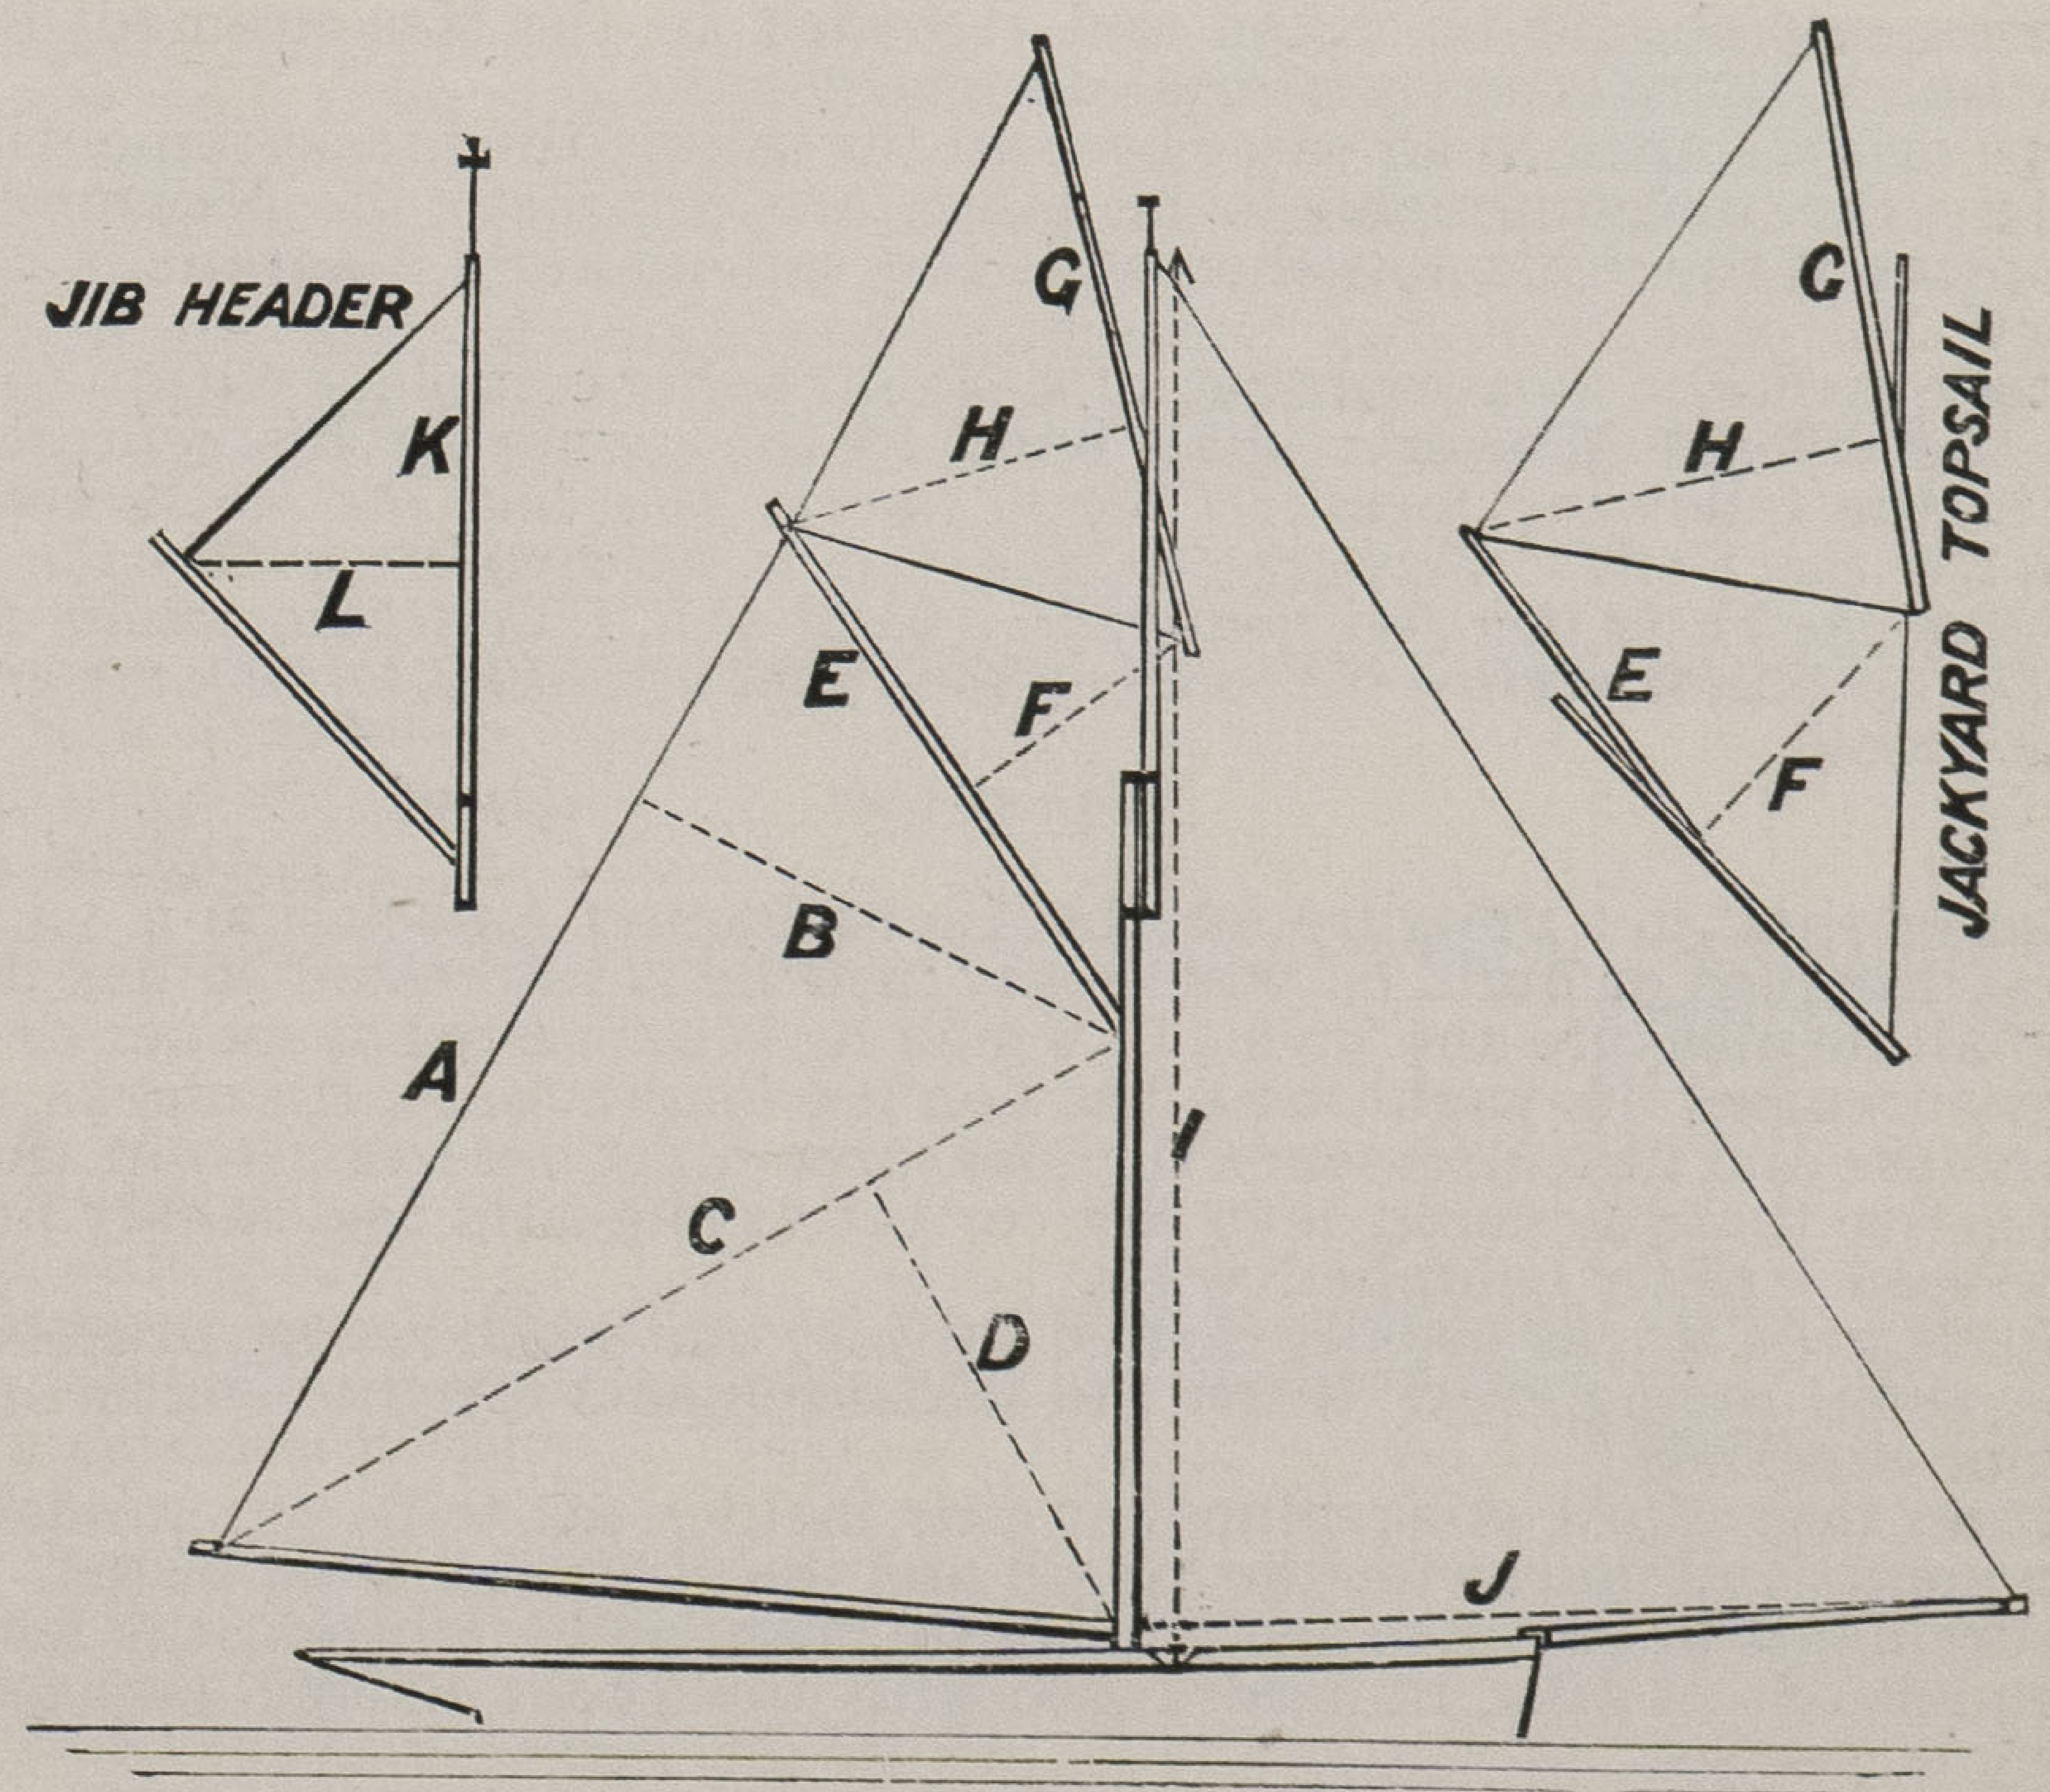
Jib Header.—To find the area of jib header—Multiply K by L, as per illustration, and divide the product by 2.

Head Sails.—To find the area of head sails, jib topsail, or spinnaker—Multiply I (measured from the deck) by J, as per illustration, and divide by 2.

Pole Mast Head Sails.—To find the area of head sail, for pole mast—Multiply I by J, as per illustration, and divide by 2.

SCHOONER'S AND YAWL'S SAILS.

The area of a schooner's sail or a yawl's sail would similarly be found; in the case of a yawl having a lug mizen the lacing holes in the yard would be taken as the upper boundaries.



YACHT RACING ASSOCIATION.

EXTRACTS FROM THE INSTRUCTIONS FOR THE MEASURERS ISSUED BY DIRECTION OF THE COUNCIL.

Official Measurers shall take the measurements of Yachts in the manner hereinafter described.

All measurements should be taken and recorded in the Measurement Book twice, and a third time if there is any material disagreement.

A steel tape or rods must in all cases be used for taking the measurements.

Immediately the measurements to be taken are complete, the Measurer shall forward particulars of the same, together with the sail maker's diagram, if required, to the Secretary.

Immediately upon the measurement of a Yacht being complete within the meaning of Rule 60, the Official Measurer shall hand to the owner or his representative an intimation in the following form;—*I beg to inform you that the measurement (or re-measurement) of the Yacht . . . . . . is complete within the meaning of Rule 60, and that the Yacht therefore now holds a valid Y.R.A. Certificate within the meaning of Rule 4. The Certificate, stating the rating of the Yacht according to the measurement, will follow in due course.*

Signed, this . day of . . . . . .

. . . . . . Official Measurer.

The Measurer shall not measure for the Yacht Racing Association a yacht or boat which he has designed or built, or which any firm he is interested in has designed or built; nor shall he measure any yacht in which he is interested as owner or otherwise.

Before measurement the yacht must have on her length and girth marks, and before testing the marks and measurements, the Measurer must ascertain from the owner or his representative that the yacht is in her correct racing trim and satisfy himself that Rule 17 has been strictly complied with.

All sails, spars, gear, &c., as usually carried by the yacht when racing, must be on board, and also the usual racing crew when the measurements for the length, or girth, are being taken or checked.

The Measurer may allow sails, spinnaker gear, tackles, &c., to be put amidships whilst the measurements and marks for the length and the girth are being tested.

The measurements to be taken are the length, beam and girth, and the lengths of the spars, or dimensions of sails, in accordance with the Yacht Racing Association Rules, for the rating of yachts.

LENGTH.

The length (L) for use in the formula shall be obtained by measuring the length over-all on deck, and deducting from this length the distances in to the bow and stern marks as fixed by the owner, from perpendiculars let fall from the bow and taffrail. These perpendiculars if measured when the yacht is afloat, are to be obtained by a hand lead sunk two or three fathoms deep, so as to ensure a steady line to measure from. The distances in from the line are to be taken by a rod placed parallel to the water surface.

After the over-all length has been taken the Measurer must see that the crew are placed at and about the mid over-all length. (See Rules 24 & 25.) He must then ascertain that the yacht is not immersed at the load water-line beyond the length represented by the owner's marks at the bow and stern.

If a yacht is measured in a tide way, the Measurer must view and verify the marks in smooth and during slack water; and the overhangs must be measured in smooth and during slack water.

If the measurement for length is obtained when the yacht is ashore the position of the bow and stern marks must be afterwards verified or checked when the yacht is afloat in racing trim, in smooth water, and before the particulars of the measurements are sent to the Secretary.

Whenever a Yacht's marks have to be tested afloat for verification or re-measurement of the length, the vertical heights of the girth marks above the water level must at the same time be also verified or re-measured, and the girth G for the formula corrected accordingly as described below under the head Girth and Girth Difference.

The over-all measurement must be taken parallel to the L.W.L. above the deck, starting from any convenient point forward on the rail, knee, &c., ahead of the fore end of the load water-line.

When the length over-all is taken with rods, a line should be stretched taut from the point forward to the taffrail to facilitate the accurate shifting of the rods.

BEAM.

The beam may be measured when the yacht is afloat or ashore. The beam shall be taken by means of a straight edge and plumb line.

GIRTH AND GIRTH DIFFERENCE.

The measurement A B C (*see* Rule 54 and Fig. 3), for the girth, is to be taken from upper girth mark to upper girth mark (*see* Rule 56) under the keel, in the plane of the girth marks, with the tape stretched taut so as to be quite straight except where in contact with the surface of the cross section. The measurement A F B G C, for the girth difference, is to be taken between the same extreme points, under the keel, and in the same plane, but following the actual outline of the cross section. The measurement A B C must be deducted from A F B G C to give the girth difference *d* for the formula. These measurements must be taken when the yacht is on the stocks or laid ashore.

The Measurer must take the height of the upper edge of the covering-board above the upper girth mark on each side of the vessel, and record it in the particulars of measurements furnished to the Secretary.

When the yacht is afloat for other measurements, the Measurer must measure the vertical heights of the upper girth marks above the actual water level, viz., A D and C E (*see* Rule 54 and Fig. 3). These heights must be taken on each side of the yacht and recorded in the particulars furnished to the Secretary. The heights must be taken when the yacht is afloat in smooth water, in trim, &c., as specified in Rule 56, and their sum deducted from the measurement A B C, to give the girth G for the formula.

GIRTH MEASUREMENTS IN SPECIAL CASES.

In the case of a yacht being fitted with a centre board or lifting keel, or having any hollow in the fore and aft under-water profile (*see* Fig. 1), or having draught at the girth station less than at some point forward of that station (*see* Fig. 2), or less than half the extreme beam, the owner shall either block up the yacht so as to show the keel lowered to its full extent, or to enable the tape to be blocked down to the imaginary keel line (*see* Rule 54, also *c d* in Figs. 1 and 2 and point B in Fig. 4), or else shall furnish the Measurer with a true drawing to scale, showing the keel lowered to its full extent, or the position of the point B, as the Measurer may require.

SPARS AND SAILS.

In measuring the main boom length from the mast to the pin of out-haul shackle, the Measurer should see that the traveller, whether on a slide or round the boom, is chock out. For this purpose the clew of mainsail should be unshackled and the traveller hauled out to the farthest point to which it can be taken.

The Measurer should ascertain for himself the point on the bowsprit or cranse iron to which the base measurement of the fore triangle must be taken.

In measuring the height of the fore triangle, a piece of white linen should be attached to the ring of the tape, and the tape can be then hoisted by the signal halyards.

Before measuring a jackyard, the sail should be bent to it, or the foot laid parallel to the yard and fairly stretched; and, as a check, besides measuring the distance from the sheet to the outer lacing hole, the number of cloths from sheet to clew should be counted.

TRIM AND LENGTH MARKS.

The Measurer must take and record in the Measurement Book such notes of the yacht's trim and length marks, by measuring the height above water at the taffrail and stem or by such other means as will enable him at any subsequent date easily to ascertain if the immersion at the water-line or the marks at the bow and stern have been altered since measurement.

BALLAST.

If a yacht has movable ballast on board, the Measurer must note its position.

WEIGHT.

When measuring any yacht under 36 feet rating, the measurer must inform the owner, or his representative, that before the certificate can be issued, a declaration must be forwarded to the secretary of the Y.R.A., signed by the owner or builder, declaring that the weight of the yacht, when in measurement trim but without crew on board, exceeds 15 cwt.

INTERNAL FITTINGS.

When measuring any yacht exceeding 36 feet rating, the Measurer must carefully inspect the below deck fittings and arrangements specified in Rule 17, and assure himself that they are provided and executed in accordance with the evident intention of the Rule; that the bulkheads specified are so placed as to divide the below deck space into compartments of serviceable size, one more in number (including the one used as the sail room) than the specified number of bulkheads; that the fittings are all of customary and serviceable dimensions; and, generally, that weight has not been saved at the expense of the properly habitable character of the accommodation.

FEES FOR MEASURING.

The Measurers shall collect the fees before measuring, and be responsible for the same to the Hon. Treasurer.

The fees shall be as follows:—

EXTRACTS FROM THE INSTRUCTIONS FOR THE MEASURERS ISSUED BY DIRECTION OF THE COUNCIL—*cont.*

Upon measuring days fixed by a Yacht Club, boats of 24 feet rating and under will be measured at an inclusive fee of £1 12*s.* 6*d.*, and half fee for girth only, or for length and beam only, or for spars only. The Yacht Club in such cases must pay the Measurer's travelling expenses. This scale applies only when not fewer than four yachts are measured on one day.

When a Measurer has to travel any distance specially to measure one yacht, the owner must pay his travelling expenses.

Upon regatta days, if sufficient notice is given to the Secretary that yachts require measurement, the fees will include the Measurer's travelling expenses; but for special visits to measure, the attendant travelling expenses must be paid by the owner of the yacht.

Ample notice must be given to the Secretary by the owner as to when his yacht is ready for girth measurement.

TIME ALLOWANCES.

In preparing the new Time Scale the following equivalents between the ratings for the classes under the length and sail area rule, and the new Linear rating rule, have, on the recommendation of the yacht designers, been adopted:—

Ratings under length and sail area rule.	Equivalents under Linear rating scale.
0·5	18 ft.
1	24 „
2·5	30 „
5	36 „
10	42 „
20	52 „
40	65 „

85 rating, under the length and sail area rule, has also been taken as equivalent to 80 ft. rating under the new rule.

The time allowances from 24 ft. to 80 ft. rating correspond nearly with those of the previous scale, but small alterations have been introduced to make the figures accord with a true curve.

Above 80 ft. rating the time allowances accord with a tangent to the time scale curve from that point. This principle has been followed with the object of increasing the time allowances to be given by Yachts of the larger ratings.

In like manner the time allowances for ratings under 24 accord with a tangent to the curve from that point.

The allowance a Yacht has to make to any smaller Yacht is obtained by multiplying the difference between the times set against their respective ratings in the time tables, by the length of the course in knots. For example, the time a Yacht of 70 ft. rating has to allow a Yacht of 65 ft. rating, over a 50 knot course, is as follows:—

70 ft. ... 199·20
65 ft. ... 190·45
8·75
50
60)437·50
7 · 17·5 seconds.

When a fraction of a second equals or exceeds ·5 it is to be counted as a second, but fractions less than ·5 are to be disregarded. In the case illustrated above, the time allowance is, therefore, 7 minutes and 18 seconds.

If one of the Yachts is above and the other below 24 ft. rating, the time allowances in the two tables found from their respective ratings added together and multiplied by the length of the course, will give the time the larger allows the smaller Yacht.
